

# HURRICANE RELIEF AND PRIORITY 1 SERVICES

Our team is FEMA certified and expertly trained, on the intricacies of hurricane season and are always ready to jump into action when needed.

**COLUMBIA GAS  
EMERGENCY**

**2019**

**HURRICANE  
LAURA & SALLY**

**2021**

**HURRICANE  
IAN**

**2018**

Our team provided fuel and generators to thousands after multiple explosions in the area left residents without gas.

**Merrimack Valley MA**

**HURRICANE  
DORAIN**

Private entity fueling, as home-improvement stores stayed open so that contractors could work around the clock to rebuild.

**South Carolina**

**2020**

With a fleet of 12 and hundreds of generators we offered critical infrastructure for city services such as utility companies & hospitals.

**Lake Charles, LA**

**HURRICANE  
IDA**

Provided generators to hospitals & utility companies. We fueled the pumping stations that controlled the levees to prevent catastrophic flooding.

**New Orleans, LA**

**2022**

Worked to restore power with local and national utility companies while also providing generators throughout the region.

**Fort Meyers, FL**

## WE'VE GOT YOUR BACK.

We cannot control when a natural disaster will strike, but we can control how effectively and efficiently we prepare for and recover from them. Our crew is not only trained in emergency response, but our experience and state-of-the-art equipment also enable us to provide assistance under some of the harshest of circumstances.

When we arrive at an emergency, our Priority 1 team will assess the situation. Through communication with FEMA and other state agencies, we prioritize fueling for emergency vehicles, utility companies, police and fire trucks, hospitals, aboveground and underground tanks, and generators in disaster zones based on importance.
